PROFESSIONAL SUMMARY

Frontend Engineer with 2+ years of experience designing and shipping user-facing interfaces across enterprise and startup environments. Proven ability to build micro-frontend architectures, reusable component libraries, and accessible, responsive UI within a 20+ MFE ecosystem — while integrating cleanly with backend APIs and design systems. Experienced with Angular, React, TypeScript, Design Systems, Webpack Module Federation, and complex, regulated systems.

SKILLS

Architecture & UI: Micro Frontends | Webpack Module Federation | Design Systems | Reusable Component Libraries | Figma

Programming: Angular (16+) | React | TypeScript | RxJS | NgRx | JavaScript | HTML5 | CSS | SASS | Python | Java | Jest | RESTful APIs | OAuth | SpringBoot | Bootstrap | OracleDB | MongoDB

DevOps & Tools: Git/GitHub | VSCode | Agile/Scrum | Jira | Docker | Kubernetes | TDD/BDD | CI/CD | Jenkins

AI/GenAI: Python GenAI Services | LLM Agent Workflows

WORK EXPERIENCE

Frontend Engineer (Angular) – Citi (Client) | Scadea Solutions

Irving, TX | Oct 2024 – Present

Policy Alignment Hub (GenAI Platform)

- Serve as one of two frontend engineers on a cross-functional team building a policy alignment platform that centralizes organizational policy ingestion, giving each user a personal dashboard to manage documents and launch AI-driven assessments.
- Build React interfaces surfacing AI-generated alignment scores and recommendation text that help users compare uploaded documents against defined regulatory and industry-standard criteria.
- Partner with a Python GenAI services team (assessment/scoring engine) and a Java team (document and application services) to ship assessment workflows end-to-end.
- Contribute to LLM-based agent workflows that orchestrate assessment kickoff, result generation, and downstream remediation planning.

ERM Reports Orchestration Platform

- Designed, implemented, and tested a micro-frontend Angular module within a 20+ MFE ecosystem using Webpack Module Federation, integrating 8+ backend microservices and improving load performance ~35% through caching and optimized API orchestration.
- Engineered a configurable approval workflow engine supporting 5 stages, 8 roles, and granular permissions — enabling full auditability and regulatory compliance for enterprise reporting.
- Built reusable UI framework components (dashboards, tables, modals) and a role-based entitlement system (50+ mapped actions), maintaining 90%+ Jest test coverage through unit and integration testing, and contributing to framework upgrades and codebase refactoring.

Risk Management Portal

- Developed Angular dashboards with responsive, accessible UI for reconciliation validation across financial systems, supporting 500+ Risk & Compliance users in detecting data discrepancies and breach scenarios.
- Connected front-end features to back-end systems via RESTful API integrations; implemented transaction-level drill-down views and execution controls, handling error responses and edge cases to maintain product stability.

Software Engineer Intern | Light Links

Santa Cruz, CA | Jan 2024 – Oct 2024

- Built mobility control protocol logic enabling seamless handoff between visible-light transmitters with zero perceptible data loss; contributed to low-level debugging and performance testing in a real-time networking environment.
- Developed kernel-level networking components using Rust and eBPF to optimize packet handling and latency for hybrid Wi-Fi/light-based communication systems.
- Built personal projects using React, focusing on component-based UI development, state management, and integration testing — applying front-end fundamentals outside of core work responsibilities.
- Selected for UC Berkeley SkyDeck accelerator (Sep 2024 cohort), collaborating with researchers and industry mentors.

Learning Technologies Assistant | UC Santa Cruz

Santa Cruz, CA | May 2022 – Jan 2024

- Developed a media inventory management website that improved workflow speed by 90% and streamlined setup of networks, live streaming, and recording for campus events.

EDUCATION

University of California, Santa Cruz — B.S. Computer Science | Graduated: June 2024
